Internal combustion engines or small outdoor equipment must be drained of all fluids (gasoline, diesel and/or motor oil) prior to loading. If you ship used outdoor household articles from a federally regulated gypsy moth area into the state of California, you must certify that the used outdoor articles have been inspected in accordance with the California Food and Agriculture Code and does not contain gypsy moth egg masses. Any questionable items should not be shipped. A completed USDA Gypsy Moth Self-Inspection Checklist must be provided to U-Pack prior to trailer dispatch.

Federal and State law enforcement agencies frequently inspect our trailers and facilities for the presence of illegal shipments. We fully cooperate with all law enforcement agencies conducting investigations in the trafficking of illegal substances.
